

Press release

New axial product catalogues by Pollrich DLK Fan Factories

At the ISH in Frankfurt, Pollrich DLK Fan Factories presented the newly developed axial fan series **Toromax** by Pollrich DLK (low pressure range) and by **ToromaxPro** by Pollrich DLK (medium-pressure range with guide vanes).

The two new series are the result of million investments in the latest manufacturing technology and the use of up-to-date tools for product development.

The axial fan catalogue contains both series, which are optionally available as ex-proof version according to directive 94/9/EC. Another axial smoke extraction fan catalogue is dedicated to both series in temperature class F300 and F400.

The new catalogue concept allows a preselection of the required fan depending on best efficiency or best price. All technical data of the selected fan for the particular operating point is shown on a single catalogue page. A wide range of accessories enables the configuration of the requested fan. Specifications and a fan-

ABC complete both product catalogues.

The catalogues are available for download under www.pollrichdlk.com.

With the trademark Pollrich DLK Fan Factories, the companies Pollrich Ventilatoren GmbH and DLK Ventilatoren GmbH offer the widest product range on the fan market:

Heavy-duty industrial centrifugal fans, compact industrial centrifugal fans, axial fans, plug fans and smoke extraction fans.

Pollrich DLK Fan Factories combines more than 140 years experience of both companies in industrial fan manufacturing.
